

QUARTZLINE

SMARTCONNECT

BE SMART.
CLEAN SMART.

Smart solutions
for **efficient hygiene**

Why? Efficiency in facility services

At Euro Products, we are committed to supplying high-quality hygiene products. Our QuartzLine SmartConnect dispensers are at the heart of our modern, intelligent approach to facility services. Thanks to real-time information on the contents of the dispensers and their usage, QuartzLine SmartConnect provides your cleaning teams with the necessary tools to utilise their time more effectively and prevent unnecessary stock.

Benefits of QuartzLine SmartConnect dispensers include

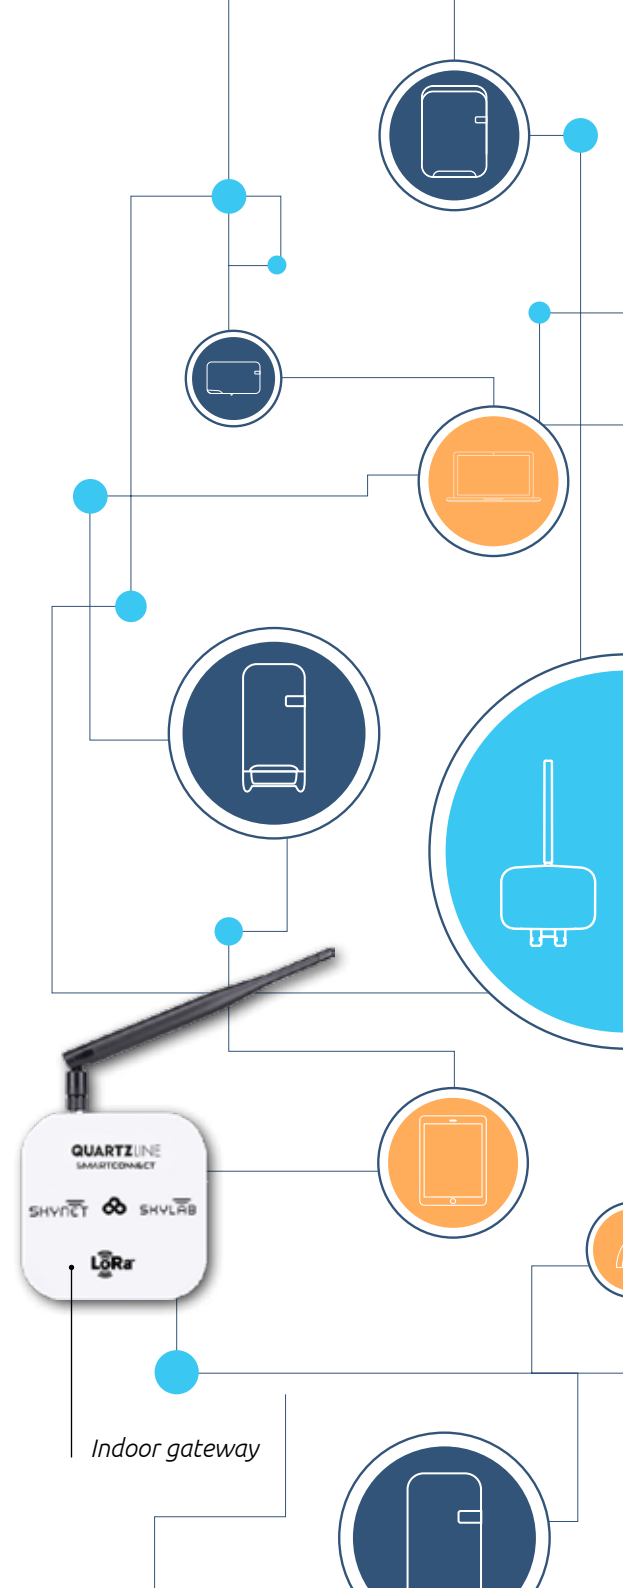

- **Immediate overview** - Always an up-to-date overview of how full the dispensers are.
- **Efficiency** - Facility staff can better manage their time.
- **Cost savings** - Prevents unnecessary stock and reduces waste.
- **Improved hygiene** - Ensures dispensers are never empty which leads to better hygiene.
- **User experience** - Increases customer experience by minimising the chance of an empty dispenser.
- **Flexibility and scalability** - Customisable to your organisation's size and needs.

Moving toward integrated cleaning management

Our smart dispensers are just the beginning. They provide a solid foundation for scaling up to a comprehensive package that covers your entire cleaning process, from inventory management to task execution.

- **Full control** - An integrated system that meets all your cleaning requirements.
- **Enhanced experience** - Streamlined processes for both staff and customers.

With smart dispensers and the possibility of expansion, you are optimally prepared for the future of facility services.

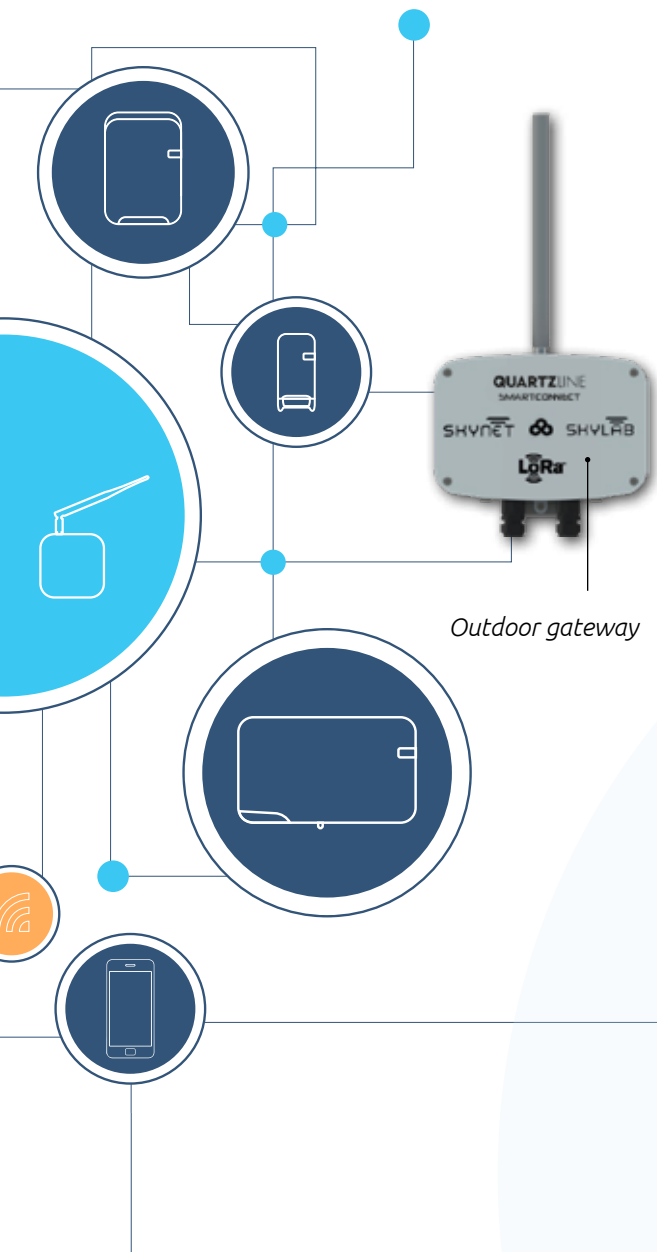

How? Connecting with LoRaWAN® Sensing Technology

Our QuartzLine SmartConnect dispensers are equipped with sensors that utilize LoRaWAN®, a powerful long-range communication tool specifically designed for Internet of Things (IoT) applications.

Benefits of LoRaWAN® include:

- **LoRa = Long Range** - Perfect for long-distance communication. Provides extensive indoor coverage, even in buildings.
- **Energy efficient** - The long battery life reduces maintenance and replacement frequency.
- **Security** - End-to-end encryption ensures secure data transfer.
- **Ease of installation** - Wireless sensors are easy to install without the need for complex infrastructure.
- **Scalability** - Flexible network expansion with additional sensors to meet your growing needs.

Thanks to LoRaWAN®, our smart dispensers can effectively communicate and provide essential real-time information for managing your facility services. This allows you to proactively manage and optimise your cleaning processes.

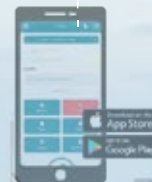

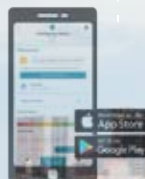

Smart packages for efficient hygiene

At Euro Products, we offer three separate QuartzLine SmartConnect packages that will take your facility services to the next level.

QuartzLine SmartConnect packages

- **Starter package** - An affordable entry-level model with monitoring via an online dashboard. Budget-friendly and easy to scale up to a professional package.
- **Professional package** - Monitoring through a specialised app for greater flexibility and convenience. Users can set their preferred language.
- **Complete package** - An all-inclusive solution with integrated sensors and extensive functionality. Perfect for maximum control and efficiency in your facility services.

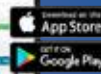

All packages use Skynet IoT's LoRaWAN® network and provide unique features that are tailored to your needs. Whether you manage a small office or a large shopping centre, QuartzLine SmartConnect has the perfect solution for you!

STARTER package

- ✓ An affordable entry-level model that provides monitoring via an online dashboard.
- ✓ Valuable insights with a budget-friendly solution.
- ✓ Easy to scale up and upgrade to the Professional package.

Professional package

- ✓ Monitoring through a specialised app.
- ✓ The Professional packages offers more flexibility and is user-friendly.
- ✓ Users can choose their OWN LANGUAGE and customise industry-specific terminology, ensuring optimal communication and app usage.

COMPLETE package

- ✓ A tailor-made solution by our partner Levyi.
- ✓ Designed to optimise the entire cleaning process.
- ✓ The app includes:
 - Task planning
 - Quality management
 - DKS
 - Checklists
 - Issue management
 - Custom forms
 - Time tracking
 - File management
 - And more
- ✓ Possibility to choose the employee's preferred language!
